<b>(54) Title:</b> G-MOTIF OLIGONUCLEOTIDES AND USES THEREOF  <b>(57) Abstract</b>  The present invention relates to a composition comprising an oligonucleotide comprising (a) the sequence N <sub>1</sub> -N <sub>2</sub> -G-N <sub>3</sub> -G, wherein N <sub>1</sub> represents any nucleotide if N <sub>2</sub> and N <sub>3</sub> are G; N <sub>2</sub> represents any nucleotide if N <sub>1</sub> and N <sub>3</sub> are G; and N <sub>3</sub> represents any nucleotide if N <sub>1</sub> and N <sub>2</sub> are G, or (b) the sequence of (a), wherein at least one nucleotide is replaced by a corresponding nucleotide analog or derivative. The present invention further relates to the use of the composition, and/or the oligonucleotide of the present invention for the production of a pharmaceutical composition for preventing or treating septic shock, inflammation, autoimmune diseases, T <sub>H</sub> 1-mediated diseases, bacterial infections, parasitic infections, viral infections, spontaneous abortions, and/or tumors.
